Profile

I am a front end developer with **over 15 years of experience** specializing in Javascript, Typescript and React.

Having worked across diverse fields from education to health care, I've demonstrated a consistent ability to adapt and thrive in any new challenge or industry (i.e. I do well under pressure).

My goal is always to create **efficient, user-friendly and easy to maintain** web solutions.

Highlights

- I was a **full stack developer** for half of my career, so I am comfortable doing backend work
- I have worked as a **consultant** for almost 6 years, so I know how to talk to non-developers
- I have worked on **mobile first, hybrid apps** for almost 4 years
- I have worked on **infrastructure** as well (AWS, Azure, Firebase)
- I have **led projects** and feature initiatives :
 - from analysis and planning all the way to deployment and maintenance
 - spanning multiple months (up to a year)
 - with small squads of up to 3 junior to mid-level developers
- I have helped UX designers and product owners **validate technical feasibility** of upcoming features
- I have helped **interview and evaluate** job candidates
- I have taken ownership of the **onboarding process** for newcomers

Skills

Javascript 16 years	Node.js 8 years	TypeScript 7 years	React & Vue.js 7 years
Express.js & Nest.js 5 years	Storybook 4 years	Jest & Mocha 4 years	Styled components 3 years
Ionic framework 3 years	GraphQL & Hasura 3 years	CSS modules 2 years	Framer motion 1 year

I can also work with other languages like Java, C# and Python.
