Montréal, Québec, H2R

Profile

I am a frontend developer with **over 15 years of experience** specializing in Javascript, Typescript and React.

Having worked across diverse fields from education to health care, I've demonstrated a consistent ability to adapt and thrive in any new challenge or industry (i.e. I do well under pressure).

My goal is always to create **efficient, user-friendly and easy to maintain** web solutions.

Highlights

- I was a **full stack developer** for half of my career, so I am comfortable doing backend work
- I have worked on mobile first, **hybrid apps** for almost 4 years
- I have worked as a **consultant** for almost 6 years, so I know how to talk to non-developers
- I can work on **infrastructure** (AWS, Azure, Firebase)
- I have **led projects** and feature initiatives :
 - from analysis and planning all the way to deployment and maintenance
 - spanning multiple months (up to a year)
 - with small squads of up to 3 junior to mid-level developers
- I help UX designers and product owners **validate technical feasibility** of upcoming features
- I help **interview and evaluate** job candidates
- I can take ownership of the **onboarding process** for newcomers

Skills

Javascript

16 years

Node.js

8 years

Typescript

7 years

React & Vue.js

7 years

Express.js & Nest.js

5 years

Storybook

4 years

Jest & Mocha

4 years

Styled components

3 years

Ionic framework

3 years

GraphQL & Hasura

3 years

CSS modules

2 years

Framer motion

1 year

I can also work with other languages like Java, C# and Python.
